

***CPSWeek 2014,
April 14 - 17, 2014
Berlin, Germany***

CPSWeek is the major multi-conference dedicated to research and development of cyber-physical systems (CPS). It concentrates on various aspects of CPS research, such as real-time systems, control design, sensing, security, applications, as well as on various emerging research topics. CPSWeek gives immediate access to the community of experts and a body of research work on relevant topics.

Be part of the CPSWeek and facilitate the collaboration of your institution with companies and the research community.

More information: <http://www.cpsweek.org>

CPSWeek Exhibition Area

CPSWeek 2014 is pleased to offer to companies, research institutes, or other interested parties:

Exhibition space

Standard exhibition booth: 2 m x 3 m with a table, chairs, and power supply
1.000 € per day or 2.500 € for all 3 conference days (April 15-17)
(Other sizes, including wider areas for demos, are available upon request.)

The exhibition area is located in the central lobby of CPSWeek's hotel such that all conference participants will pass by regularly: when entering the conference area, when changing between the collocated conferences, upon coffee breaks, etc. The lobby is spacious and easily accommodates numerous booths of all sizes as well as demo areas.

Please feel free to contact CPSWeek's exhibition chair **Martin Fränzle** for negotiating your specific needs.
